Phenotype Database License Terms

The source code of the Phenotype Database components is licensed under the Apache License Version 2.0 (http://www.apache.org/licenses/) and is available at GitHub (https://github.com/PhenotypeFoundation). The license on the source code allows partners to setup their own local instance of the Phenotype Database.

License

Currently the Phenotype Database contains both publicly accessible studies and studies accessible by a limited group of accounts only.

The publicly accessible studies in the Phenotype Database fall under the Creative Commons Attribution 3.0 Unported license (CC-BY 3.0) license, which states that you are free to share (copy, distribute and transmit) and remix (adapt) the work as long as you attribute the work in the manner specified in our terms of use. For any reuse or distribution, you must make clear to others the license terms of the work. The best way to do this is with a link to the CC license web page.

All other studies are accessible by specific accounts only and fall under the specific consortium agreement (CA) of the project. To these studies the CC-BY 3.0 license does not apply and these studies may not be freely shared and remixed, until decided otherwise.

Terms of use

Contributing

When entering information this should reflect your best understanding of the experiment or study you are describing. Data managers from TNO will help you with the upload (see Study (meta) data sharing paragraphs).

Downloading

You can download study information and data accessible by your user account in any of the available data formats provided by the Phenotype Database website.

An API for computational access is incorporated in the system, that will be used by the integration work package from querying and analysis of the data.

Using

You are free to use the study descriptions and data which are licensed under the CC-BY 3.0 license in presentations, documents, websites and publications. You are free to use the study data in analyses, qualitative or quantitative. But you must cite or give appropriate attribution (see Attribution below).

You are not allowed to use study descriptions and data not licensed under the CC-BY 3.0 license in any manner without permission from the study owner.

Redistributing

You are free to redistribute study descriptions and data which are licensed under the CC-BY 3.0 license on your website, as part of your own resource, or with your own software application, as long as you properly attribute the Phenotype Database and make it clear that the information is free and freely available from the Phenotype Database.

You are not allowed to redistribute study descriptions and data not licensed under the CC-BY 3.0 license in any manner without permission from the study owner.

Attribution

When referring to the Phenotype Database or content, please cite:

Ben van Ommen, Jildau Bouwman, Lars O. Dragsted, Christian A. Drevon, Ruan Elliott, Philip de Groot, Jim Kaput et al. Challenges of molecular nutrition research 6: the nutritional phenotype database to store, share and evaluate nutritional systems biology studies. Genes & nutrition 5, no. 3 (2010): 189-203.

When referring to an individual study, study description, or study data, please cite:

- The original publication describing the study as specified in the "Publications" section of the study description
- The study in the Phenotype Database in the form "Study Title, Phenotype Database, Url", e.g.:

PPS2 - Evaluation of the acute whole-body response to glucose stress in C57BL/6J mice, Phenotype Database, http://studies.dbnp.org/NuGO_PPS2

Disclaimers

We do our best to provide the Phenotype Database as a stable and responsive service. The Phenotype Database instance (http://studies.dbnp.org) is located at TNO, The Netherlands. The server hosting this instance is behind TNO firewalls and is being backed-up daily to other servers to maximize availability of the service and minimize the risk of data loss. However, we provide the Phenotype Database and accompanying services on an "as is" and "as available" basis, and we expressly disclaim all express or implied warranties of all kinds, so please keep back-ups of the data on your own server.
